

ANDRES TRUJILLO

DevOps and Technical Programmer

AndresSphere2003@gmail.com • (720)-639-1695 • <https://www.andresmtrujillo.com/> • [in/andresmichaeltrujillo](#)

PROFILE

Gameplay and Technical Engineer, specializing in gameplay features, product deployment & developer operations. Seeking full-time summer project work to utilize my skills to make a positive impact.

SKILLS

Programming Languages

C/C++, C#, CMake, JavaScript, Unreal Blueprints, Lua with Sol2, Visual Scripting, PowerShell (Familiar), Python (Familiar), SQL

Technical Skills

Gameplay Programming, Build Engineering & DevOps, Game Engine Programming, Technical Documentation, Version Control.

Tools/Framework

Unreal Engine 4 & 5, Blender, Godot 4, Unity, Node.js/Express.js, WinForms, Inno Installer, GitHub Actions, Git, Perforce, SVN, Excel (Macro Scripting)

Relevant Coursework

Data Structures, Algorithm Analysis, Computer Networking, Operating Systems, Technical Game Design

PUBLISHED TITLES

- *Idol On Duty, Third Person J-Pop Beat-em up platformer experience*

May 2026

WORK EXPERIENCE

Resident Advisor

April 2023 – Present

DigiPen Institute of Technology | Housing Department

- 3-Time returning highly rated RA known for outstanding leadership, dependability and engagement
- Support and mentor 40+ residents in campus housing to help ensure comfort and safety
- Collaborate with university staff to improve student program participation and 100% adherence to safety inspection standards
- Successfully manage conflict resolution and crisis response situations

Team Leader & Member

May 2021 – March 2022

Harkins Theatres | Northfield 18

- Capably supervised and retained team of 8-10 associates in high-volume premier property
- Helped train over 25 new hires to meet and exceed Harkins professional and operational efficiency standards

TEAM PROJECTS

Gameplay & Technical Programmer | Producer

Aug 2025 – Present

Idol On Duty, 3D Third-Person Beat-Em-Up Platformer - Unreal Engine 5.4 | Team of 20 | Academic Project

- Assumed Producer role of under-performing team mid-development to stabilize the project roadmap, oversee task management, and lead team meetings for the "The Backstage Crew" development team. Capably led team of 8 programmers, 6 artists, 3 game designers, 1 audio designer
- Implemented dynamic cutscene manager, level checkpoint manager, moving and collapsing platforms, and more level components utilizing unreal C++ and blueprints.
- 3D Modeled, rigged, animated, and coded the behavior for a passive-aggressive enemy type in game utilizing unreal animation blueprints, C++, and the program Blender for dynamic animations and entity behavior.
- Successfully architected automated build and development workflows using PowerShell and batch scripts, streamlining project access and synchronization for non-technical team members. Delivered finished development build on time while exceeding expectations

Gameplay & Technical Programmer | Deployment Operations

Aug 2024 - April 2025

Hockey Stop, 2D Action Platformer - C++ Custom Engine (Non-Applicable Engine) | Team of 6 | Academic Project

- Engineered a custom text rendering system with full UTF-8 support, including precise newline and whitespace handling for localized text.
- Automated deployment pipelines via GitHub Actions, integrating automated build tests, & versioning to reduce wait times by 30%.
- Implemented native Tiled Map Editor support into the engine, empowering level designers with streamlined environment creation tools.

Serialization System & Deployment Toolchain

Aug 2024 – May 2025

'Non-Applicable' Engine, 2D Custom C++ Engine - Team of 4 | Academic Project

- Architected a recursive node-tree serialization system, enabling flexible object and scene persistence in a custom engine.
- Developed cross-platform CMake configuration for Windows, Linux, & Mac managing complex library dependencies and Clang settings.
- Created automation scripts to integrate the toolchain with GitHub Actions, ensuring consistent environment parity and remote compilation.

EDUCATION

BS in Computer Science and Game Design | DigiPen Institute of Technology |

Expected Graduation May 2027
